Improvements:

- Shows more of the content within the page.
- Able to render recommendations from SQL DB and submit new projects. (NEW FEATURE)
- Designs a more personal experience in which the user can use and find new content.
- Coherent design with the other pages within OSF.io
- Sorts current research projects and creates a community that tags the current data rather than needed to create another algorithm to map all of these nodes.

Going Forward:

- Possibly select some of the colors that might best suit the page.
- Limit the number of projects viewed on the tabs.
- Redefine parameters to select data on the API.

Fold of the page on a 15" MacBook Pro:
